**Year 5,**  
**River Mead School, Melksham**

Possible only through climate change

October 2016, when it all began

Let's raise awareness of Global Weather Change

At only 14 years of age, Ben achieves a dream

Recordings, observations, scientific data collected

Outstanding views of ice so high

Circumnavigating the North Pole like never before

Everybody do your bit, flick the switch

All hands to the deck!

Northabout boat, the vessel making it all happen

Challenging thinking about how we treat our planet

Have you thought about the future of our world?

Animal's habitats changing too fast to adapt

Loss of life in becoming inevitable

Look around you see the damage done

Everyone unite to slow, still, stop the fast change

Nothing stopped them from achieving their goals as one

Give it all you can, got to keep going – fight against climate change

Everybody now needs to do their bit to slow climate change together!
