

"If ever there were a cause which should unite us all, old or young, rich or poor, climate change must be it."

Kofi Annan, Chair of The Kofi Annan Foundation and The Elders

WWW Schools Climate Change Programme

Who we are

Wicked Weather Watch helps primary pupils and teachers to know more about climate change, and to take action to help conserve our fragile planet. Our vision is for children to have the passion and skills they need to be responsible citizens in the world beyond school and to take small steps that have a positive impact on our local and global environment.

We focus on the Arctic – a breath-taking region of global climatic importance - to inspire young people and teachers to understand how our activities impact this awesome part of the world, how that links back to our own lives here in the UK and what we can do to protect our world.

Our work with schools

We inspire – school visits: Our fantastic speakers have either travelled to the Arctic or are experts in climate change. Their talks – available in person or virtually – bring climate change to life through adventures and first hand experience.

We engage – fun and creative events: Our Arctic themed events allow children to get interactive with climate change. Workshops are available in person or virtually and can be tailored to your schools' needs.

We support learning – teaching resources: Developed with teachers our free materials support teaching about climate change, sustainable living and the polar regions in a way that is fun and creative while meeting curriculum requirements. Teachers have used the resources for topics such as Explorers & Adventurers, Cold Environments, Splendid Skies, the Poles and many more!

We connect – a global issue: Through our partnerships we connect to millions of others who share our desire to help our fragile world.

Prices

We would love to offer our activities for free but as a charity we ask for a small contribution to the costs of running the programme. Our rates are heavily subsidised to make them as accessible as possible for all schools but if you would like to take part but are worried about covering the costs please call us. For full terms and conditions see www.wickedweatherwatch.org.uk

Talk or assembly (20 mins – 1 hr)	In person: £50	Virtual: £25
Workshops for 1 class or year group with one facilitator	In person half day workshop: £125	Virtual 2 hour workshop: £90
	In person full day workshop: £250	
Multi-year or whole school event	Individually priced based on number of sessions and facilitators needed.	

"I first travelled to the Arctic in 1982. The region I saw then is almost unrecognisable to what it is now. The lives of people living in the normally year-round icebound communities are changing drastically, as are the habitats of walrus, whales, seals, polar bears - whole marine ecosystems. Permanent irreversible change seems inevitable. We must bring home the message to children in the UK and help them to act and engage."
